Yasha Zamanpour | PHP Back-end Developer

Location: **London**
Telephone: **07475347992**
Email: **yasha.zamanpour@gmail.com**

Professional Profile

Experienced developer with 16 years of experience and knowledge in using PHP and MySQL to help businesses improve performance, reduce human error, increase the speed of business processes, establish effective communication with users and customers, and reduce headcount and therefore business costs. Highly driven, results focused, and firmly committed to developing a career in back-end development.

Education

- **Bachelor's degree in Software Technology Engineering**   Sep 2014-Sep 2016
  Islamic Azad University, Tehran, Iran
- **Associate's degree in Computer Software**   Sep 2004-Jan 2008
  University of Applied Science and Technology, Qom, Iran

Work Experience

Co-Founder and Full-stack Developer (Part-time)   Sep 2015-Sep 2022
Gallery Online, Iran

Outline
It was the first online visual arts publication in Iran with more than 400,000 unique visitors and collaborated with all art associations and universities in Iran to cover art events. It also provided facilities for artists, art galleries, and art associations, including website development, portfolio design, etc.

Key Responsibilities
- Software project managing and writing a project charter and business plan.
- Analysing the Iranian art market and gathering the artists' requirements.
- Developing and setting up a website that achieves all of the milestones outlined in the charter.
- Analysing software performance and identifying ways to improve accuracy and efficiency.
- Designing and developing clients' websites and portfolios that fully meet client's requirements.
- Writing functional code for websites using PHP, MySQL, HTML, CSS, and JavaScript.
- Managing a 15-person team consisting of developers, designers, reporters, and photographers.

Key Achievements
- Viewed by more than 75,000 unique visitors and gained 3 million hits in just 3 months.
- Achieved all goals according to the project charter and business plan.
- Developed the first online art fair in Iran in collaboration with the Iranian Painters Association.

PHP Back-end Developer (Full-time)   Jun 2006-Sep 2022
Hamayesh Sazan Novin, Iran

Outline
Development of numerous websites and web applications to support activities related to the organisation of congresses, from registration of participants, receipt of articles, and online review of articles to issuance of congress participant cards, printing of the book of abstracts, and online presentation of articles.

Key Responsibilities
- Developing websites/web applications that fully meet user requirements
- Attending meetings and gathering end-user requirements, prioritising needs, and assessing risks
- Analysing software performance and identifying opportunities to improve accuracy and efficiency
- Managing a 10-person technology team consisting of developers and designers
- Rigorous testing of applications, identifying problems, and debugging
- Writing functional code for websites using PHP, MySQL, HTML, CSS, and JavaScript

Key Achievements
- Successfully analysed the project and prepared a Gantt chart so that more than 90% of the client's needs and 100% of the client's main needs are solved in the shortest possible time.
- Tested and uploaded the project according to the original schedule.
- Upgraded and improved performance deficiencies in legacy systems, resulting in cost savings for the company.
- Led migration process to new application with zero downtime.
- Reduced of the company's expenses for the organisation of congresses by 50% due to the reduction of the workforce.
- Reduced of human errors in event organisation by 70% due to automation of most processes.
- Increased 40% more participants in events due to the improved website search in search engines and the possibility of online registration.
